**Mountain Health Center**

Mountain Health Center became a Federally Qualified Health Center in 2013. We are a non-profit community health center. We serve both the acute and chronic care needs of our patients, focusing on a goal of health, not simple absence of disease.

Mountain Health Center is a medical home where people can engage in coordinated and comprehensive health care, which is important to our practice.

Comprehensive care plans include patient generated goals and specialty referrals. We take care of you when you are ill and work with you to achieve health, recognizing that your health care demands your involvement.

*Mountain Health Center offers translation services for our patients as well as Telecommunications Relay Service (TRS) and American Sign Language.*
